Retrofitblue – huge potential savings through enhanced efficiency for old and existing systems or buildings.
Feel the future and get to know the advantages:

No major downtime during replacement • Huge reduction in noise level • Low energy consumption
www.ziehl-abegg.co.th

Successful retrofit examples:

Heat exchanger

Highly-efficient ZAplus units with ECblue motors. Estimated savings/year: 25% energy savings*

Supply air system

Efficient space-saving centrifugal fan formation with ECblue motors. Estimated savings/year: 37% energy savings*

*Results vary depending on application, load cycle, the control and installed equipment etc. with many of our RETROFit customers experiencing >50% energy savings

Online Seminar
Efficient fan systems in AHU
27th July 2021
14:00-16:00 Thailand Time
Presenter: Ms. Sarinya Theeravanichkul
Presentation Language: Thai
